Criteria	Ratings			Pts
Introduction	2 pts Full Marks Physics and background information required to understand the experiment are well explained in students' own words.	1 pts Partial Marks Some physics and background information required to understand the experiment are not well explained.	0 pts No Marks Physics and background information required to understand the experiment are not well explained.	2 pts
Experimental Setup and Technique	4 pts Full Marks Description of the experiment setup is complete and clear and in students' own words.	2 pts Partial Marks Description of the experiment setup and technique is incomplete.	0 pts No Marks Description of the experiment setup and technique is missing.	4 pts
Raw Data	4 pts Full Marks Required raw data are collected, clearly recorded and have reasonable values, units and significant figures.	2 pts Partial Marks Raw data are insufficiently presented, or some data or units or significant figures are wrong.	0 pts No Marks Majority of results of measurements are wrong.	4 pts
Uncertainty of Direct Measurements	4 pts Full Marks Uncertainty of direct measurements is present and correct.	2 pts Partial Marks Uncertainty of some measurements is wrong or missing.	0 pts No Marks Uncertainty of direct measurements is wrong or missing.	4 pts
Sources of Uncertainties	4 pts Full Marks Analysis of sources of uncertainties is complete.	2 pts Partial Marks Analysis of some sources of uncertainties is missing.	0 pts No Marks Analysis of sources of uncertainties is missing.	4 pts
Data Analysis and Calculations	4 pts Full Marks There is complete analysis of measured data. It is clear that the	2 pts Partial Marks Analysis of measured quantities is present, but incomplete.	0 pts No Marks Analysis of measured quantities is missing or wrong.	4 pts
